

# LIQUID AUTOFILL SYSTEM FOR BUBBLERS

Project                      Date                      Model    **250-00051**                      Item#                      Quantity

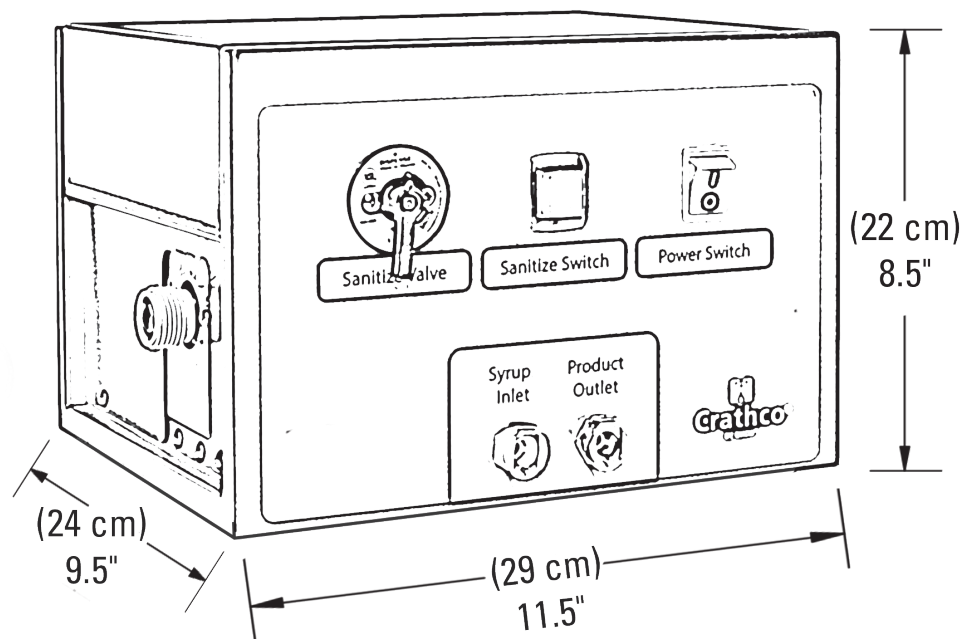

model 250-00051

## Features

- Increase productivity beyond bowl capacity in your cold beverage machine!
- Automatic refilling of bowls as the product drops below the preset level.
- Placed between the dispensing bowl, liquid concentrate, and a potable water line, the autofill system mixes the liquid concentrate and water together and refills the bowl.
- Safeguard controls prevent the overfilling of the bowls.
- Use with the Simplicity series of bubble machines, the Classic Bubbler Standard series models D15, D25, D35, and the Classic Bubbler Mini-bowl series models E29 and E49.
- Automatic shutdown at power failure.
- Mixing ratio of 5:1, with other ratios available.
- Compatible with liquid box products used to create chilled or frozen drinks.
